Summary

I'm a self-taught full-stack web developer with a strong foundation in PostgreSQL, JavaScript/TypeScript, and React/React Native. I specialize in building interactive, creative applications from end to end. I'm seeking a junior software development role where I can contribute to meaningful, user-focused projects, deepen my technical expertise, and collaborate with a team that values experimentation and thoughtful design.

Relevant Experience

2022 – present ♦ **Independent Developer** : Shipped multiple full-stack personal projects end-to-end. Implemented user auth, real-time updates, and REST integration. Explored system design, state architecture, and animation workflows.

Projects

MoogBoard

- ♦ An interactive application inspired by the MoonBoard training tool for climbing and music production tools like Ableton.
Tech Stack: React, JavaScript, TypeScript, Supabase, tone.JS, TailwindCSS.

Sandman Slug Fest

- ♦ Injects dynamic targets into any webpage. Alerts users with sound, tracks click response time, and logs results.
Tech Stack: JavaScript, HTML, Chrome Extension API.

Birthstone

- ♦ A Canadian crag-focused weather app built using Environment Canada's public API.
Tech Stack: JavaScript, EJS, CSS.

Pluto

- ♦ A Discord bot that scrapes game retailer data for comparative pricing and sales.
Tech: JavaScript, Discord API.
